

Anubhav Joshi

Backend Engineer, AI Infrastructure | magicalfizz@gmail.com | github.com/anubhav-qt
Jaipur, India | Portfolio: anubhavqt.vercel.app

CORE THESIS & SPECIALIZATION

Drawing a hard line between what must be provable and what is allowed to be generated.

Production backend engineering in Python & TypeScript; asynchronous pipelines, PostgreSQL, pgvector.

EDUCATION & ACADEMICS

Manipal University Jaipur - B.Tech in Artificial Intelligence & Machine Learning

CGPA: 9.28 / 10.0 | Academic Merit Scholarship

ENGINEERING EXPERIENCE & SYSTEMS

Anchorate - Co-Founder & CTO (Early-Stage)

- Architected runtime policy interception layer between AI agents and external tools.
- Built real-time PII redaction, prompt injection detection, and pgvector audit logging.

Spoink - Flagship Generation Pipeline & Quota Governor (33 ADRs)

- Built asynchronous LangGraph generation engine with CQRS isolation; sub-50ms feed read latency.
- Designed 2D (key x model) QuotaGovernor across 40+ free-tier API keys, achieving 130+ cards/min.
- Fixed critical burst rate-limit bugs via ADR-0040 per-cell mutex network serialization.

Trotter - Deterministic Quantitative Equity Research Engine

- Pure TypeScript financial math engine; Gemini 2.5 Flash strictly for qualitative narrative reasoning.

Fraud Vote - Automated Electoral Roll PDF Biometric Audit

- OpenCV contour segmentation, Google Cloud Vision OCR (98%+), and 128D deep face encodings.

Paribelle - Multi-Tenant E-Commerce Platform (NestJS, TypeORM, Next.js 14)

- Pessimistic row locking (SELECT FOR UPDATE) preventing inventory race conditions. 48 onboarded users.
